Quo vadis, Higgs boson?

Sunday, 27 November 2022 14:00 (45)

The Higgs boson has recently celebrated the 10th birthday of its discovery. In the meanwhile, we have learned a lot about its properties, but there is still much more to be learned...

In this talk, I will give an overview of what we already know about it and what there is still to be understood. Furthermore, I will discuss the implications to the unanswered questions of the Standard Model of particle physics.

Category

Particle / Astroparticle / Cosmology (Theory)

Primary author(s) : GROEBER, Ramona (Università di Padova and INFN, Sezione di Padova)

Presenter(s) : GROEBER, Ramona (Università di Padova and INFN, Sezione di Padova)

Session Classification : Keynote Physics Talks 5

Track Classification : Physics talks
