Quick facts

Slovenia, a country in Central Europe, is known for its mountains, ski resorts and lakes. On Lake Bled, a glacial lake fed by hot springs, the town of Bled contains a church-topped islet and a cliffside medieval castle. In Ljubljana, Slovenia's capital, baroque facades mix with the 20th-century architecture of native Jože Plečnik, whose iconic Tromostovje (Triple Bridge) spans the tightly curving Ljubljanica River.

PostDoc in Theoretical Particle Physics

Stefan Inst., Ljubljana • Europe

hep-ph hep-th astro-ph PostDoc

⌚ Deadline on Dec 1, 2022

Job description:

The department of Theoretical Physics at the Jožef Stefan Institute is announcing a three year (2+1) postdoctoral position. It is funded for three years by the [Slovenian national research agency](#) through a research grant, led by Dr. Miha Nemevšek. The topic concerns theory and phenomenology of particle physics in the early universe and colliders, present and future.

The focus is on first order phase transitions, false vacuum decay, dark matter, thermal field theory and resulting gravitational waves. Collider studies involve the relation between triggering cosmological and laboratory signals in well defined frameworks, preferably related to neutrino mass origin. The selected candidate will have the opportunity to collaborate with the rest of the group and external experts.

The recipient will be hosted by the particle physics group in a dynamic environment with regular events: international [workshops](#), [group retreats](#), [seminars](#) and [summer schools](#). The vibrant community of 6 senior + 2 junior faculty members, 4 postdocs, 5 PhD students (+ MsC, BsC and internships) and regular visitors, offers many opportunities for collaboration.

The funds cover the monthly salary, including pension and insurance, travel funds for workshops, visits and small equipment. The two year contract is expected to start in the fall of 2023. The extension for the third year will be decided after the end of the first year.

The applicants with a PhD should have background in quantum field theory, physics of the early universe, Monte Carlo simulations and BSM physics. The application consists of a research statement and a CV with a list of publications, as well as two or three letters of recommendation, to be sent to the email below. Alternatively, the applicants can also apply via AJO [here](#).

Preference is given to applicants submitting before December 1st 2022.

Contact: Nemevšek, Miha (miha.nemevsek@ijs.si)

Letters of Reference should be sent to: miha.nemevsek@ijs.si

Postdoc in Theoretical Particle Physics

Stefan Inst., Ljubljana • Europe

hep-ph hep-th hep-lat PostDoc

⌚ Deadline on Dec 1, 2022

Job description:

The [particle theory group](#) at the Jozef Stefan Institute in Ljubljana, Slovenia invites outstanding young researchers to a post-doctoral position.

The areas of interest include grand unification, supersymmetric and extra-dimensional models, flavor physics and CP violation, baryon and lepton number violation, Higgs physics, particle dynamics in the early Universe, collider phenomenology, applications of machine learning to particle phenomenology, and lattice QCD, both within the Standard Model and beyond.

The particle physics phenomenology group members are: J. F. Kamenik (head), B. Bajc, S. Fajfer, N. Kosnik, L. Leskovec, Nemevsek, S. Prelovsek Komelj, L. Ubaldi.

The position starts in fall of 2023 and lasts until the fall of 2025 with a possible one-year extension.

Applications must include a CV, a list of publications, a statement of research interests and the names of two senior scientists who will provide letters of reference. The application and recommendation letters deadline will be December 1, 2022 and we will follow the "Theoretical High Energy Physics Groups Common Deadline for Postdoc Offers" agreement.

Eligible candidates should hold a PhD degree in Theoretical Particle Physics at the time of the position start. For further information, and to apply, please write directly to hep-th@ijs.si.

Contact: Kamenik, Jernej F. (hep-th@ijs.si)

Letters of Reference should be sent to: hep-th@ijs.si
