

International Workshop on Medical Ultrasound Tomography

Thursday, November 2, 2017

Poster session - Poster area (3:00 PM - 4:00 PM)

[id] title	presenter	board
[22] The USCT reference data base		
[56] Improved temperature measurement and modeling for 3D USCT II		
[60] Comparison of two ray tracing methods for sound speed imaging		
[23] Fast reflectivity imaging in 3D using SAFT		
[44] Minimum-variance beamforming for ultrasound computer tomography imaging		
[35] Object Classification and Localization with an Airborne Ultrasound Imaging System		
[38] Contrast resolution enhancement of Ultrasonic Computed Tomography (USCT) using a wavelet-based method – Preliminary results in bone imaging		
[50] Visualisation of Ultrasound Computer Tomography Breast Data Set		
[39] Comparison of registration strategies for USCT-MRI image fusion: preliminary results		
[55] Measurement of the speed of sound, attenuation and mass density of fresh breast tissue		
[57] Piezofibre composite transducers for next generation 3D USCT
