

Conference Papers

- This will be refereed papers!
- It is very difficult to convince referees and funding agencies
- What we would like to see are review type articles which
 - emphasize the importance of monitoring
 - might include historical results / status / state-of-the-art of the field
 - discuss obvious examples
 - give an insight which is broader than just your own work
- We will all profit from such a collection.
- It will significantly simplify writing applications and reports

Quality over time!
