Green IT at Universitys

Results from GAiT Project & Working Group Green IT

Lena Ritzinger | 26.09.2024

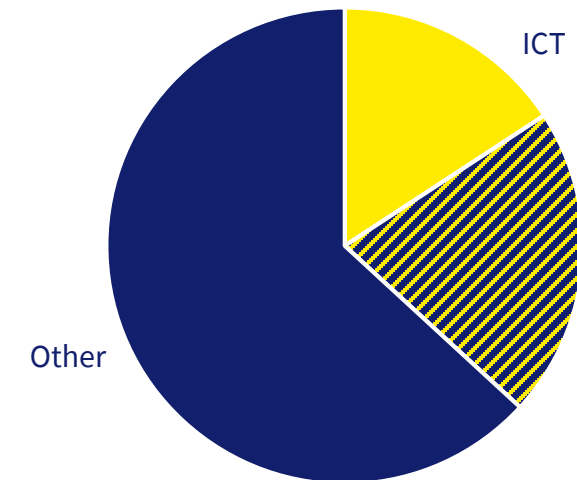

Why Green IT?

▶ Regulatory compliance:

- ▶ Annual energy savings (-2%/a) (§ 6 EnEfG, Landesstrategie Green IT)
- ▶ Net greenhouse gas-neutral public administration till 2030 (§11 KlimaG BW)
- ▶ Reduce resource consumption

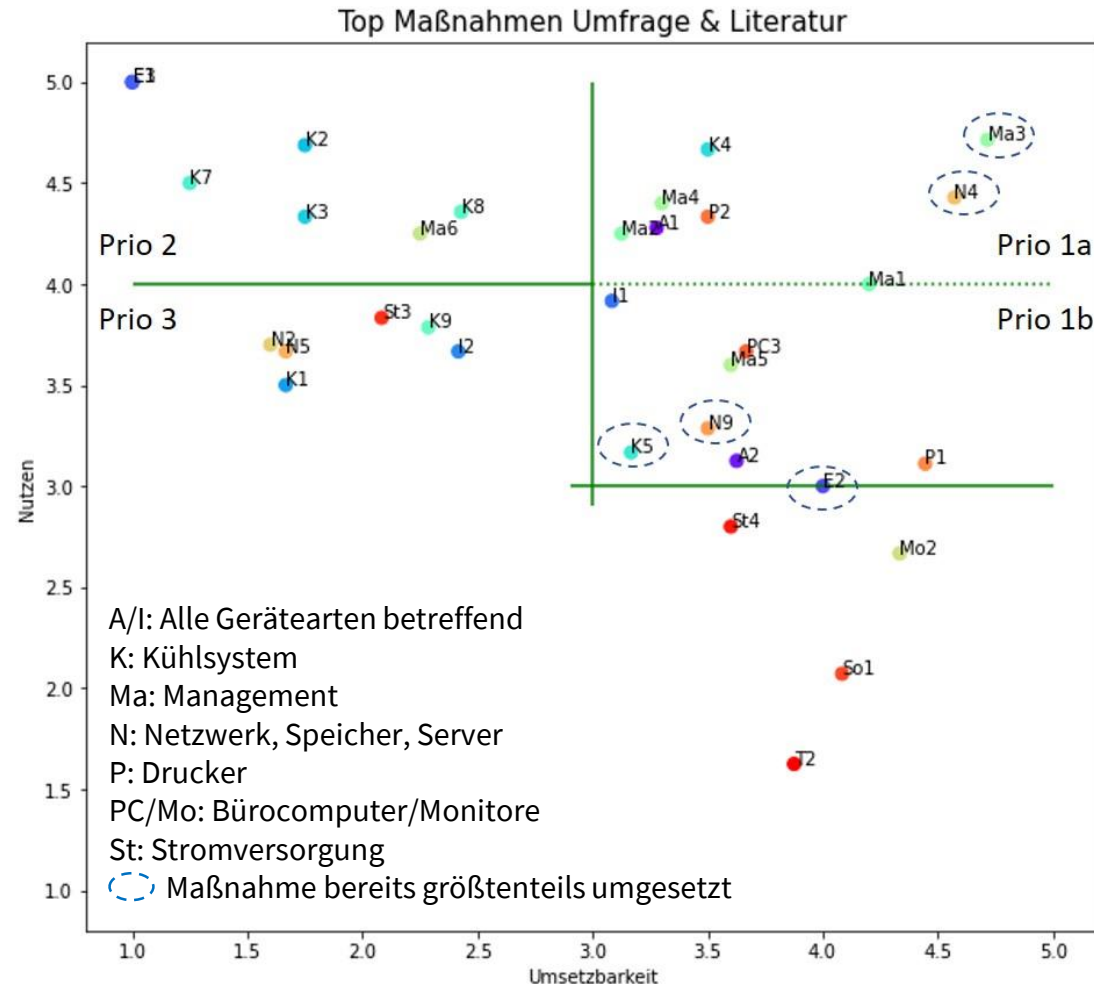

Share of ICT at the whole energy consumption of universitys

Realize Green IT-measures and measure success

Results of the project

Priorisation of measures

- ▶ Priority 1: Contains mainly measures that do not need to be implemented in the data centre
- ▶ Priority 2: Contains almost exclusively measures relating to the optimisation of air conditioning.
- ▶ Create awareness through transparency:
 - ▶ Target KPIs: Energy and resource consumption, carbon emissions, share of sustainable products in new procurements
 - ▶ KPIs for optimising operations
 - ▶ Sustainability criteria for procurements

Outlook AP2 bwCloud3:

„bwCloud goes green“

- ▶ Transfer and establish measures and KPIs to the bwCloud
- ▶ Enable ecological comparison of own data centre with cloud services
- ▶ Promoting sustainability not only at individual facilities, but also making the state administration as a whole more sustainable
