

- 
- A photograph of four people standing in a room. From left to right: a man in a grey jacket and glasses, a woman in a red sweater, a woman in a dark blue sweater, and a man in a pink shirt holding a gift wrapped in clear plastic with a green ribbon. They are all smiling and looking towards the camera. The background shows a dark screen and a whiteboard.
- Thank you for coming to Bad Honnef
 - The seminar was unique experience and a tremendous success
 - It was made possible by the great characters of the participating researchers
 - Great invited talks!
 - The posters entertained a diversity of data-driven science cases, from machine learning, to generic frameworks, and causal inferences from observational data. We would have liked to award prizes to all of them, but had to reduce dimensionality due to limited resources. Let me once more congratulate, on behalf of all of us, the winners of the contest.
 - There will be short report in the Physik-Journal and, possibly, in an APS journal (Michael?)
 - For the report, I will be happy to receive some inspiring testimonials by Email.
 - We took nice photos and with your permission we can include them in the report.
 - If you disagree with publication of photos, let me know, and we can try a little photoshop experience.
 - Let us thank the **hospitality of the Physikzentrum** and the **generosity of the WE-Heraeus Foundation** which made this meeting possible.

711. WE-Heraeus-Seminar *FAIR*-well

Andreas Haungs, Karl Mannheim, Matthias Steinmetz
